SOFTWARE ENGINEER & ASPIRING AI STUDENT

Aspiring AI Master’s student with a strong foundation in backend and full-stack development. Experienced in Software Engineering and actively expanding expertise in Artificial Intelligence. Passionate about applying AI to develop innovative and impactful solutions.

EDUCATION

FAU Erlangen-Nürnberg <i>Master of Science in Artificial Intelligence</i>	Erlangen, Germany Oct 2024 – Present
French-Azerbaijani University and University of Strasbourg <i>Bachelor of Science in Computer Science</i> CGPA: 98/100, 1.1(German system)	Double Degree Oct 2020 – Jul 2024

TECHNICAL SKILLS

Languages	: Java, JavaScript, TypeScript, Python, C, HTML/CSS
Frameworks	: Spring Boot, Nest.js, Express.js, React.js, Django, FastAPI
Databases/ORMs	: DynamoDB, MongoDB, PostgreSQL, MySQL, Redis, AWS RDS, Hibernate, TypeORM, Prisma, Sequelize
AI Skills	: Pytorch, Tensorflow, CUDA, LangChain, LLaMA, Scikit-Learn, ChromaDB, Pinecone, Hugging Face
Dev Tools	: Docker, Kubernetes, GIT, Gitlab, BitBucket, Celery
APIs	: REST, GraphQL(Apollo)

EXPERIENCE

Working Student (Software & AI Engineering) <i>DoNexus GmbH</i>	May 2025 – Nov 2025 Munich, Germany
- Built OCR-driven PDF processing and data-extraction pipelines using OCR + AI to ingest documents, extract text, identify key fields, and map them into structured database schemas. - Developed an AI-driven template creation & auto-fill feature, converting PDFs into templates and populating them via LLM prompts and database data. - Enhanced pipeline performance and scalability through efficient embedding strategies and vector storage optimizations.	
ML/AI Engineer <i>BIRainy</i>	Mar 2024 – May 2025 Baku, Azerbaijan
- Developed scalable RAG systems using the LangChain framework, Vector DBs, and optimized for better performance using custom chunk splitting techniques. - Fine-tuned several transformer-based speech-to-text models to work with the Azerbaijani language. - Achieved a BLEU-4 score of 52.7 and ROUGE-L of 66.1 on Azerbaijani ASR fine-tuned model using a hybrid Wav2Vec2 architecture with 150h+ of transcribed data. - Developed self-supervised Azerbaijani ASR models using Wav2Vec2.0, achieving WER of 12.5% and BLEU-4 of 41.3 on unseen data.	
Software Engineer (Part-Time) <i>Interneuron AI</i>	Mar 2023 – Mar 2024 Baku, Azerbaijan
- Designed and developed a scalable backend system for an AI application leveraging Python’s Django framework. - Architected and implemented the entire application infrastructure, including a relational database, from the ground up, optimizing for scalability and security. - Leveraged AWS services such as EC2, S3, and RDS to deploy backend systems, reducing downtime and improving user experience. - Containerized and deployed LLM models using AWS Fargate.	

- Partnered with cross-functional teams, including AI engineers and frontend developers, to deliver an AI solution that exceeded performance benchmarks.

Software Engineer (Part-Time)

Edument

Mar 2022 – Mar 2023

Baku, Azerbaijan

- Developed a Learning Management System (LMS) CRM tool using NestJS, MongoDB, PostgreSQL, and Redis.
- Designed scalable database architectures and optimized real-time data processing, achieving a 25% boost in system performance.
- Ensured robust error handling, improving application stability and minimizing downtime.

Software Developer Intern (Part-Time)

Morpho

Jun 2022 – Oct 2022

Baku, Azerbaijan

- Engineered a GraphQL architecture with proper versioning, pagination, and caching.
- Implemented CQRS pattern and optimized system for better performance.
- Reduced API latency by 35% using parallelization techniques.
- Collaborated in agile scrum teams, delivering projects on time and improving team efficiency.

LANGUAGES

English (C1 – IELTS 8.0), French (A2) , Russian (A2), Azerbaijani (Native), Turkish (Bilingual)
